

Language and Earnings: The Association Between Chinese Language Use and Wages in the United States

Joshua Stewart

2026-05-11

1 Introduction

2 Data

2.1 Source and Sample

2.2 Key Variables

2.3 Descriptive Statistics

3 Analysis

3.1 Income Distribution by Language Status

3.2 Nested Regression: The Reversal

3.3 Subgroup Analysis: Ethnically Chinese Americans

3.4 Interaction by Race

3.5 Robustness: Stability Across Random Samples

4 Conclusion

4.1 Limitations
